PRICE ONE CENT,

MAKE IT LAW

Probable Prompt Passage of the Children's Bill at Albany.

GERRY SURE OF BOTH HOUSES

Unjust Commitment of Children to Be Made Impossible.

The new bill providing for review by a superior tribunal of commitment of children by police magistrates, drawn by President Gerry, of the Children's Society, which was fully explained in yesterday's Evening World, is expected to be introduced in the Assembly to-day.

It will be offered by Assemblyman Andrus, of Buffalo, who is one of the most influential and prominent members of the lower House, having just been appointed by Speaker Husted Chairman of the Committee on Cities.

The bill will take the usual course and be referred immediately to the Judiciary Committee, which is composed of Messrs Acker, of Steuben (Chairman) .; F. S. Johnson, of Wyoming: Towne, of Chauauqua; Whipple, of Cattaraugus; Peck, of Cortland; Deyo. of Broome; Stranaban. of Oswego; Greene, of Orange, Coons, of Schonarie: Henderson, of Herkimer, and Hudson, of Yates.

It will probably be several days before the Committee thoroughly organizes and settles down to business, so the measure will not be likely to come up for con-sideration this week; but as all arrange-ments have been made to advance the bill with the greatest possible despatch, the prospect is that it will be one of the first to become a law during the present session.

the prospect is that it will be one of the first to become a law during the present session. President Gerry, himself, will look after the measure as soon as it comes up in the Committee, and says that he has made arrangements to go up to Albany early next week to present his brief upon the subject, the main points of which have aiready been given in The Evening World.

"I anticipate very little opposition to the measure," said Mr. Gerry to-day. "especially now that I have so strong a supporter as The Evening World. This will be likely to shut off considerable opposition that might otherwise be naturally expected from a class of legislators who never lose an opportunity to make political capital out of such a fight.

"There will be no trouble whatever in the Senate Judiciary Committee, for Judge Robertson, the Charman, is of the responsibility and completeness of the remedy proposed, and will secure a favorable report for the bill.

"Then all that will remain to be done is to get the signature of the Governor, which will be given as a matter of course, and steen we should have a law that will, hope and believe, do away with all further to be done in the state of the course of the course, and steen we should have a law that will, hope and believe, do away with all further to be done in the state of the course, and steen we should have a law that will, hope and believe, do away with all further to be done in the state of the course, and steen we should have a law that will, hope and believe, do away with all further to be considered in industry in the state of the course, and steen we should have a law that will, hope and believe, do away with all further to be considered.

"I suppose I tore up a dozen drafts of this bill before I finally got it to suit me, and now," added Mr. Gerry, with some pride, "I think it would be rather diffi-

ealt to improve upon it."

As the buil affects institutions all over the State there will undoubtedly be considerable anxiety among the managers of the various asylums and chi-dren's homes to know exactly what the effect of the new iaw will be.

One of the greatest advantages to be derived from the new bill will be that it will make police magnitudes much more careful and thorough in their investigation of a case of commitment, most of the trouble in the past having arisen from carelessness and lack of proper inquiry at this single of the proceedings.
